

June 16, 2021

**Quadrille is proud to support British Forces Broadcast Service (BFBS) and their work to deliver information and content to the UK Armed Forces and humanitarian aid projects, especially during this global health crisis.** Quadrille and BFBS have worked to develop QuadriFast technology into the BFBS solutions, enabling the organization to send all types of content including, video entertainment, newspapers, training manuals. Quadrille's MSTORE is fully integrated into the BFBS media gateway, MiPlayer, allowing any Quadrille operator to manage incoming files and transfer streams.

Quadrille's QuadriFast™ and QuadriLive™ solutions transport content using satellites, terrestrial, and cable. QuadriFast™ pushes non-linear content and stores it on STBs or a media gateway where it is immediately accessible for viewing on a television, or on a smart device via local wi-fi. Likewise, QuadriLive™ delivers Live OTT content that can be viewed using the same access hardware. Quadrille's MSTORE client can dynamically manage incoming and stored content for distribution, update, and removal. It can also be customized to incorporate, content filtering, ad insertion, ad stitching, replays, and catch-up of any kind.

#### **About BFBS**

BFBS is a military charity and media organization that delivers content to entertain, inform, connect, and champion the UK Armed Forces. During this global health crisis, **BFBS has been working with their stakeholders and partners in the military and defense communities to deliver their core services and seek new ways to support forces audiences and communities in the UK and overseas.** BFBS is also the home of military content, championing the military by keeping their activities in the public eye on our Forces digital channels and on our national TV channel. In addition, BFBS's commercial services, which provide income for its charity, spans training, digital and creative services, and pioneering technology solutions that enable media and communication in the hardest-to-reach places.
